

Smart Translator for UFED Physical Analyzer

On-demand high quality translations in 40+ languages

As communities become more diverse, transnational crime rates are increasing. The chances of coming across digital content in a foreign language during an investigation is increasingly common.

Frontline officers and investigators do not have readily accessible professional linguists that can address all languages. The ability to have on-demand translation services, in a multitude of languages, is a true time and cost saver for any investigation.

Cellebrite has partnered with SDL to provide you with the **Smart Translator** module. This secure, Neural Machine Translation (NMT) service seamlessly integrates into UFED Physical Analyzer.

The Smart Translator Difference

State-of-the-art Neural Machine Translation services

40+ Languages

Get on-demand translation support for more than 40 languages and 120 language pairs.

Integrated

Built into your UFED Physical Analyzer solution for a streamlined investigative workflow.

Protect the Data

Safeguard sensitive content by keeping translations in-house, using an offline solution.

Save Time

Remove the dependency on professional linguists and expedite your time to evidence.

What makes Smart Translator state-of-the-art?

The Smart Translator module, powered by SDL, is a solution for those looking to apply the latest in neural machine translation to automatically translate content. With more than 20 years of experience, SDL uses the latest advances in artificial intelligence to create a solution that helps organizations break the language barriers for content-intensive processes securely, at scale. This module supports more than 40 popular languages, available as 120 convenient pairs.

List of supported language pairs

SDL and Cellebrite have partnered to provide you with the broadest language coverage, with new languages added on a regular basis. Select the language combinations that meet your agency's needs.
