

CELLEBRITE ADVANCED SERVICES

Solving your most demanding
digital forensic challenges

Comprehensive Services to Access Inaccessible Data

Mobile providers continue to invest heavily in data protection and securing their operating systems by implementing stronger encryption mechanisms and complex locks.

With Cellebrite Advanced Services (CAS), our sole focus is to provide law enforcement agencies with the “best-in-class” service to overcome these complexities amongst market-leading iOS and Android devices. Using cutting-edge, forensically sound methods, taken directly from the Cellebrite Security Research Labs, we provide leading innovations and support to help you advance your investigations. Through our diverse range of affordable services, available through an annual subscription plan, we partner with your agency, to overcome the growing backlog of complex mobile devices.

Located in ten forensic labs around the world, our team of digital forensic experts bypass the toughest locks on the latest Android and iOS devices, provide insights and guidance with major cases, and assist in solving the most complex operational, technical and procedural forensic challenges.

Having successfully accessed data from thousands of devices to-date, CAS has proven to be the go-to partner for all law enforcement agencies.

Our Areas of Expertise

Advanced Unlocking:

Determine or disable the Pin/Pattern/Password screen lock or passcode on the latest Apple iOS and Android devices. Cellebrite Advanced Extraction Services can retrieve more data from the most complex devices.

Advanced Extraction:

Cellebrite makes the world's only decrypted physical extraction capability possible for leading Apple iOS and Android devices. These capabilities enable forensic practitioners to retrieve the full file system without needing to jailbreak or root the device.

Case Assist:

With the Case Assist Service, Cellebrite extends its specialized lab capabilities to support extraction and decoding from unlocked devices supported by UFED today. This is a solution for agencies that need to offload routine cases to ease the case backlog.

Advisory Services:

Cellebrite offers evidentiary preparation for complex cases and critical investigations when extra assurance or precautions are required. Our certified forensic experts can provide independent case review or testimony if additional opinions are needed, helping you ensure the best possible case results.

Technical Services:

Our skilled forensic experts have extensive experience and tools to help you recover and examine important evidence from crushed, broken, burnt or water-damaged devices.

Support for the Widest Range of Devices

Apple Devices

Bypass or determine locks and perform a full file-system extraction of iPhone devices including the latest iPhone 11 / 11 Pro / Max running various iOS versions up to the latest 13.4.1.

- Gain After-First-Unlock (AFU) access to locked iPhones up to iPhone X, running iOS 11.3 to 13.4.1
- Perform BFU
- Access and decode relevant data on the device including third party applications, secure containers, and more.

Android Devices

- Bypass or determine locks and physically extract data on the latest Samsung devices including high running Samsung devices including Galaxy S6/S7/S7+/S8/S8+/S9/S10, A5/A7/A8, J1/J2/J3/J6/J7, Note 5/Note 7/Note 8/Note 9, plus many other Exynos-based models.
- Unlock, FDE physical extraction or FBE full filesystem extraction for latest, Huawei, Motorola, OPPI and many other devices.*

*This list is continuously updated so you should contact Cellebrite for latest information

How Advanced Unlocking and Extraction Services Work

To get started with the service, please follow the steps below:

1. Visit the [MyCellebrite Customer Community Portal](#) to sign-up and start using the service.
2. Create a new case and complete the required fields.
3. Once a case has been approved by the CAS team, send your package.
4. Track the progress of your case online.

Court-tested chain of custody procedures are maintained at all times, with a pathway to ISO 17025 accreditation underway targeting 2019 completion. Once the device is unlocked and/or extracted, it is returned to the originating agency. Any extracted data is also sent to the agency in encrypted form to ensure privacy and protect operational information. Under special circumstances, Cellebrite can also offer these Advanced Unlocking and Extraction Services onsite.

Committed to Supporting Your Mission

Cellebrite has a proven and unmatched track record of delivering innovative digital forensic solutions for current and future flagship devices from all major device manufacturers. To date, Cellebrite Advanced Unlocking & Extraction Service specialists have a 100% success rate helping law enforcement globally to access hundreds of devices.
