

APAC Crime Landscape: Connecting Signals to Intelligence

Three high-impact crime trends shaping law enforcement priorities in APAC.

Crime across APAC is becoming more digital, interconnected and fast-moving. From financial scams to organised crime and online exploitation, threats now span devices, platforms and borders, requiring investigators to move faster, connect evidence and act with greater precision.

Fraud, Scams & Financial Crime

\$442B

in global fraud losses, 30%
cybercrime share of total
recorded crime in APAC

Global Financial Threat Assessment
2026, INTERPOL

Asia and South Pacific Cyber Threat
Assessment 2025/2026, INTERPOL

KEY TRENDS SHAPING APAC

- AI-powered scam compounds scaling at industrial speed
- SNS (Social Networking Service) investment fraud and crypto laundering surging
- Elderly and digitally connected populations most at risk

Drug Trafficking & Organized Crime

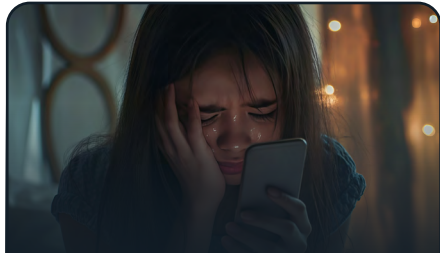

349

tonnes of methamphetamine
seized across APAC in 2025,
up 48%

Synthetic Drugs in East and Southeast Asia
2026, UNODC

KEY TRENDS SHAPING APAC

- Anonymous fluid networks replacing traditional crime hierarchies
- Dark-job recruitment via encrypted apps targeting youth
- Cross-border supply chains demand multi-agency intelligence

Child Protection & Online Exploitation

8,029

AI-generated images and
videos showing realistic
child sexual abuse, AI-
generated videos up
26,385% in one year

AI CSAM Report 2026, Internet Watch
Foundation (IWF)

KEY TRENDS SHAPING APAC

- AI-generated Child Sexual Abuse Material (CSAM) surging as legal frameworks lag behind
- Social Networking Service (SNS) grooming reaching younger children than ever before
- Volume of cases outpacing manual investigative capacity

From Fragmented Signals to Actionable Intelligence

Across fraud, organised crime and child exploitation, critical evidence is often dispersed across multiple devices, platforms and jurisdictions. The challenge is no longer access to data, but the ability to connect it quickly, surface what matters, and build a coherent intelligence picture before opportunities are lost.

One Connected Platform. From Lead to Resolution.

Cellebrite unifies the tools, intelligence and workflows investigators need to turn fragmented digital evidence into actionable intelligence, and close more cases.

Access Evidence Wherever It is.

Recover digital evidence from mobile devices, UAVs, computers, digital media and frontline submissions, in the field, at the lab or through self-service kiosks.

Leads Extraction: Recover from any source.

INSEYETS

CFID

KIOSK

Connect Evidence Across Everything.

Link devices, identities, communications, locations and financial activity to reveal hidden relationships, generate leads and uncover the people and networks behind the crime.

Connect Evidence: Reveal the full picture.

PATHFINDER

Accelerate Investigations with AI-assisted Workflows

AI-assisted workflows surface the most critical evidence first, reduce manual review and turn connected evidence into actionable intelligence, so teams can move faster from lead to action.

Accelerate Investigations: Turn evidence into intelligence.

GENESIS

Validate Findings Before You Present Them.

Recreate the exact device and OS in a secure virtual environment to confirm app behaviour, reproduce findings and strengthen evidence before it reaches the courtroom.

Validate Evidence: Confirm before you present.

CORELLIUM FALCON

Manage and Share with Confidence.

Securely manage evidence, maintain chain of custody, collaborate across teams and agencies, and prepare courtroom-ready cases on one defensible platform.

Manage and Collaborate: From case to courtroom.

GUARDIAN

Take the Next Step

Discover how to turn complex cases into faster outcomes.
